About Resin X Flooring

Resin X Flooring LLC is a British owned flooring and surfacing specialist providing premium flooring solutions across the UAE. With over 15 years of industry experience, we combine technical expertise, quality materials, and professional workmanship to deliver durable and visually appealing surfaces.

We specialise in resin bound aggregates, microcement, epoxy flooring, screeding, and floor preparation solutions. Every project is approached with precision and attention to detail, ensuring reliable results, long lasting performance, and finishes built to meet each client's requirements.

Engineering Quality Surfaces

At Resin X Flooring, we provide professional flooring solutions built on technical expertise, precise preparation, and quality installation practices. We work closely with clients, consultants, contractors, architects, and developers to deliver flooring systems that achieve the right balance of durability, performance, and design.

Specialist Flooring

We provide a complete range of flooring and surfacing solutions designed for modern residential, commercial.

Our services include:

- Resin Bound Aggregate Flooring
- Interlock Screeding
- Microcement Finishes
- Floor Preparation
- Epoxy Resin Flooring
- Self Levelling Systems

Whether creating a decorative architectural finish or a high performance industrial surface, we deliver solutions that combine strength, reliability, and refined aesthetics.

Resin Bound Surfacing

Resin bound surfacing is a premium flooring system that combines selected aggregates with a UV stable resin binder to create a smooth, seamless, and durable surface. Designed for both functional and decorative applications, it provides excellent permeability, long term performance, and a modern finish with strong resistance to daily wear.

Key Advantages:

-  Seamless Decorative Appearance
-  Excellent Durability
-  Permeable Surface Structure
-  UV Resistant Performance
-  Low Maintenance Requirements
-  Wide Selection of Aggregate Finishes

Applications:

-  Driveways
-  Paths and Walkways
-  Landscape Areas
-  Outdoor Commercial Spaces
-  Public Developments

Microcement Flooring

Microcement offers a modern alternative for creating seamless, elegant surfaces with the appearance of polished concrete.

Using advanced epoxy based materials combined with resin technology, microcement provides a strong, flexible, and refined finish suitable for contemporary interiors.

Its thin application allows installation over various substrates while achieving a premium architectural appearance.

Key Advantages:

Contemporary Seamless Finish

High Resistance to Wear

Excellent Adhesion

Water and Stain Resistant Surface

Easy Maintenance

Custom Design Options

Applications:

Luxury Residential Interiors

Commercial Areas

Hotels and Hospitality Spaces

Bathrooms

Retail Environments

Swimming Pools

High Performance Resin Flooring

Epoxy flooring provides a durable and protective surface solution designed for areas requiring strength, hygiene, and resistance.

Applied over properly prepared concrete substrates, epoxy systems create seamless flooring capable of handling heavy usage and demanding environments.

The result is a practical and visually appealing surface with excellent lifecycle performance.

Key Advantages:

Heavy Duty Performance

Impact Protection

Chemical and Abrasion Resistance

Dust Resistant Surface

Seamless Hygienic Finish

Custom Colour and Finish Options

Applications:

Industrial Facilities

Workshops

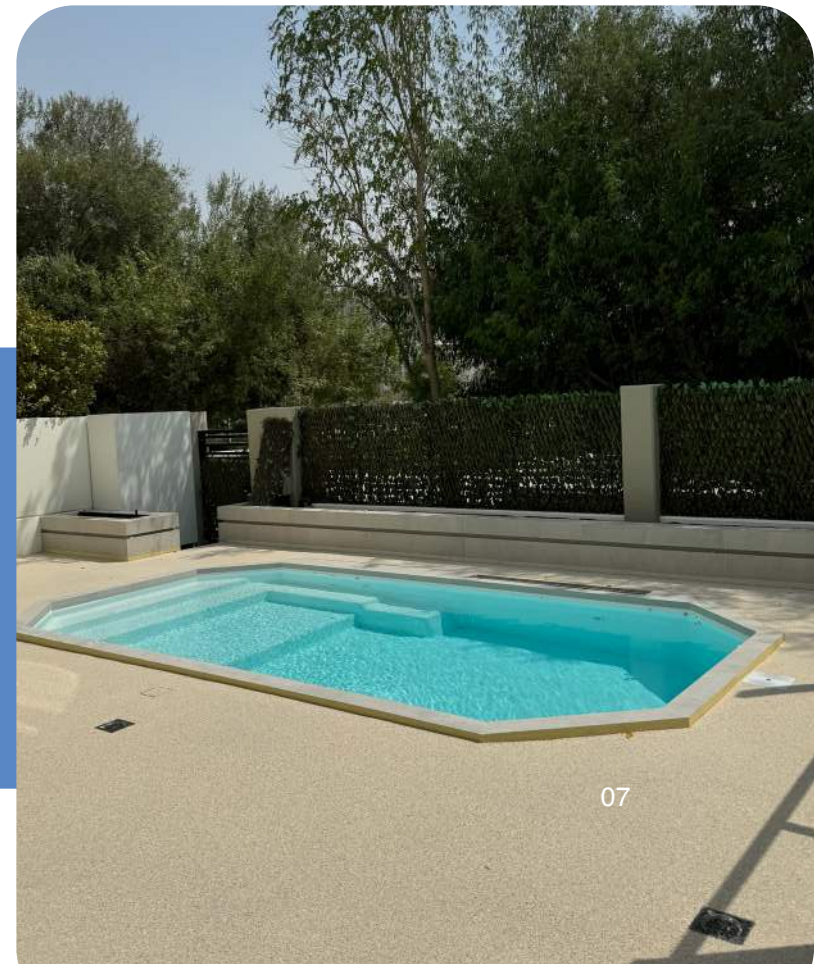

Warehouses

Commercial Buildings

Retail Spaces

Interlock Paving

Interlock paving is a durable and versatile paving solution made from precast concrete blocks designed to create strong, attractive, and long lasting surfaces. Suitable for both pedestrian and vehicular areas, it is widely used for driveways, walkways, parking areas, courtyards, public spaces, and landscape projects.

Key Advantages:

High Durability

Weather and UV Resistant

Flexible Paving System

Low Maintenance

Wide Range of Colours and Patterns

Slip Resistant Surface

Fast Installation

Cost Effective Solution

Drainage Friendly Design

Reusable and Easy to Repair

Screeding And Floor Preparation

Foundation For Perfect Installation

Our screeding and floor preparation services provide the ideal foundation for flooring installations by ensuring surfaces are level, repaired, and ready for your chosen flooring. This preparation is essential for achieving a smooth finish and long lasting performance.

Our Services Include:

Floor Screeding

Surface Grinding

Substrate Repairs

Crack Treatment

Surface Levelling

Moisture Control Preparation
